

ELARI KidGram

How to connect and set it up on Kids watches

You will need:

Kid's watch with KidGram support:
ELARI KidPhone 4GR

SIM card with access to internet and mobile network for Kid's watch

Parent's device (your smartphone or tablet) powered by Android or iOS

Kid's watch and your mobile device must have access to the Internet and mobile network during the whole process of setting up KidGram

Step 1.

Change settings in the SafeFamily app

To log in to KidGram, you will receive an authorization code via a phone call or SMS. The code will be sent to the child's phone number

The SIM card with the child's phone number must be installed in the Kid's watch and the watch must be linked to the ELARI SafeFamily application

In the ELARI SafeFamily application, go to the watch settings, select **Call limit** item and temporarily allow incoming calls by switching **off** the function. If needed, enable the function after completing the KidGram setup

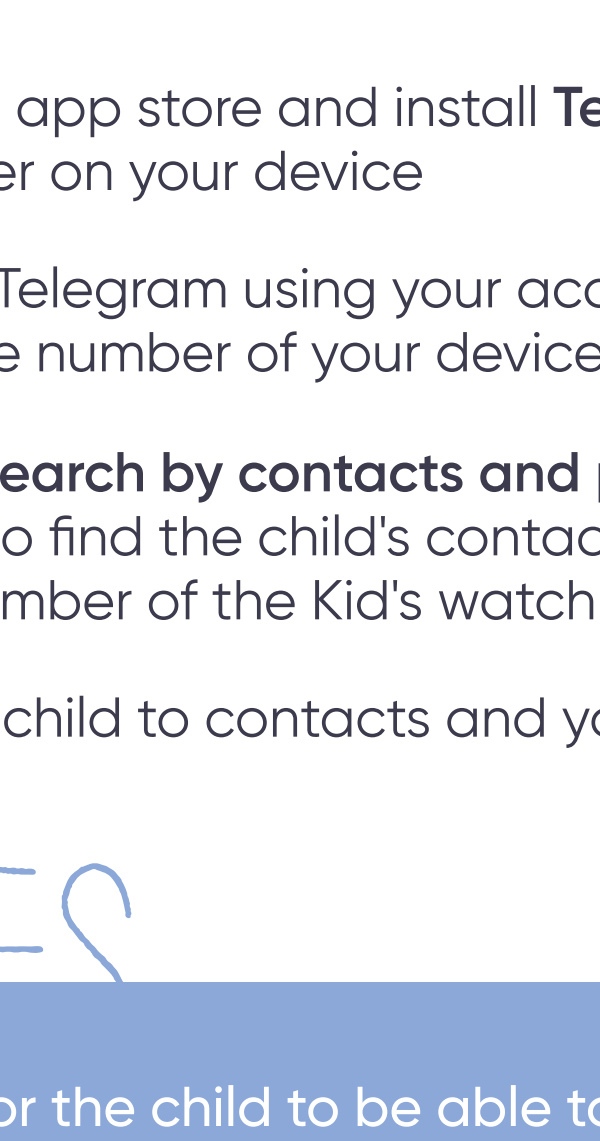

In case the Kid's watch doesn't receive a phone call, an authorization code will be send via SMS. You can find the SMS by going to ELARI SafeFamily app in the watches' settings and clicking on **SMS**

Step 2.

Log in to KidGram app on the kid's watch

Find the **KidGram** app in the watches' menu

Open the application, enter the Kid's watch phone number and press the confirmation button

You will receive a phone call or an SMS with an authorization code **on the phone number of the Kid's watch**. You can view the SMS by going to ELARI SafeFamily app in the watches' settings and clicking on **SMS**

Enter **the received code** in **KidGram** app and follow the further instructions in the application to complete the log in

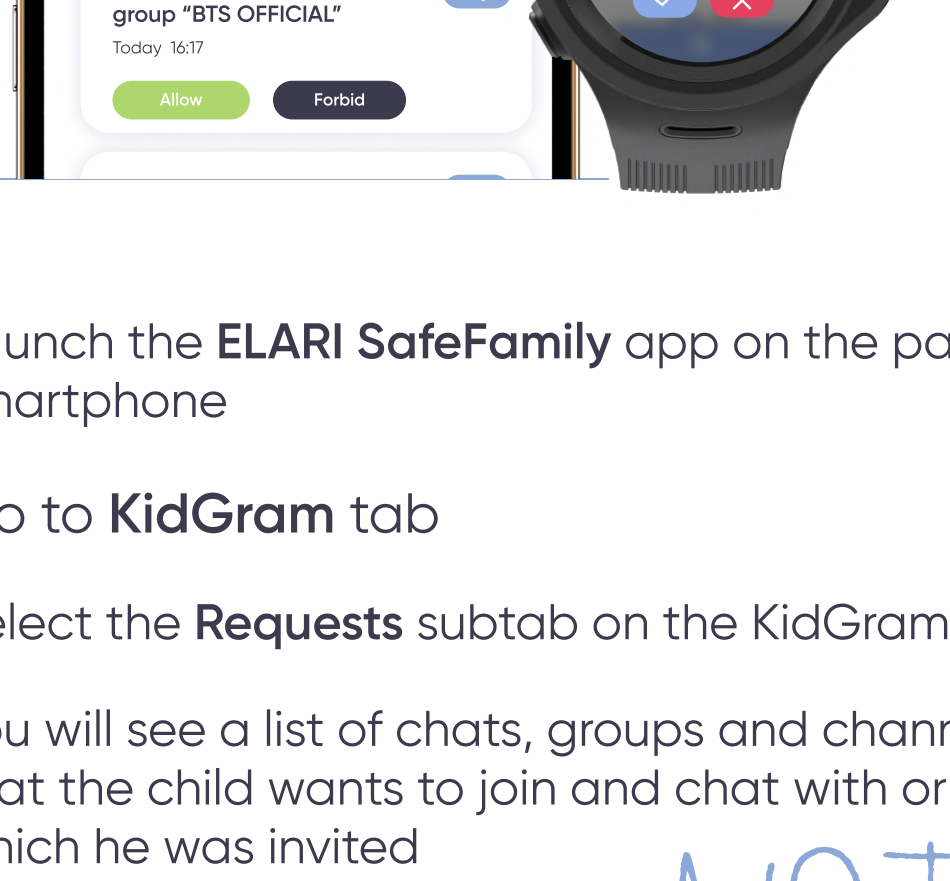

After the log in is complete, you and the contacts you allow will be able to chat with your child via Telegram and KidGram messengers, as well as share with him the wonderful content that we'll help you find!

If needed, enable the **Call limit** after completing the KidGram setup

Managing KidGram via ELARI SafeFamily parent's app

How can I chat with my child in KidGram?

KidGram app supports all content, groups and channels created in Telegram, as well as chats with Telegram users

Open the app store and install **Telegram** messenger on your device

Log in to Telegram using your account and the phone number of your device

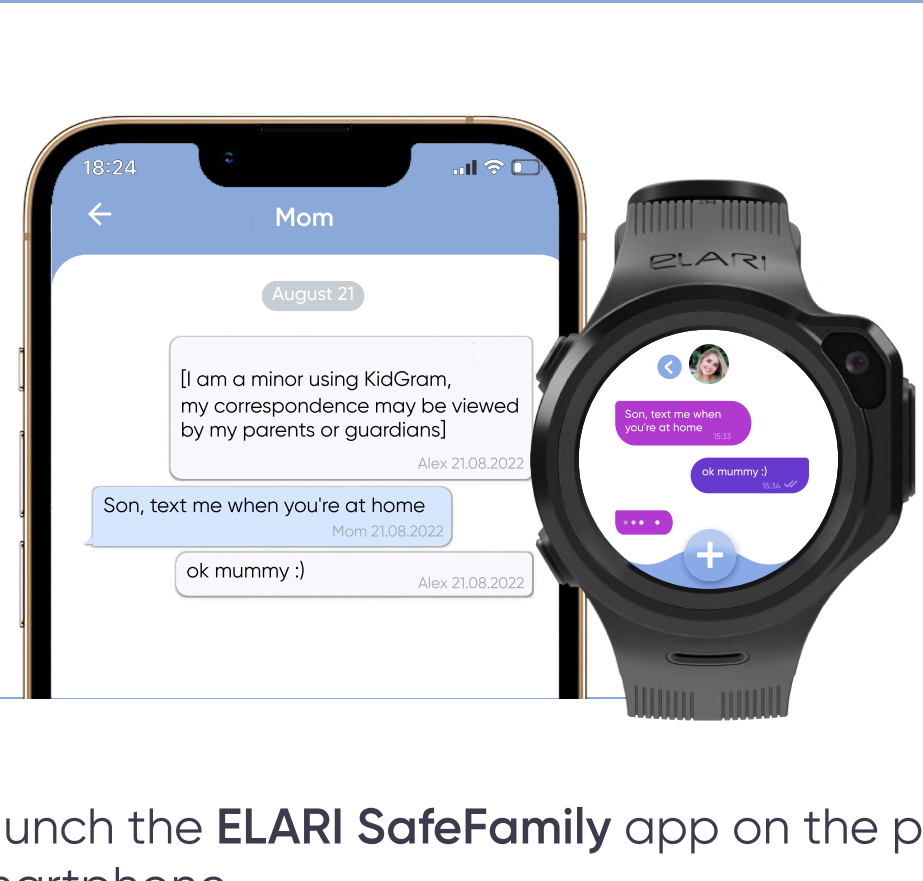

Use the **Search by contacts and people** function to find the child's contact using the phone number of the Kid's watch

Add your child to contacts and you can chat

In order for the child to be able to reply you, you must allow chat in the ELARI SafeFamily application

Read more in the "Allow or deny chats" section

Ban the searching of groups, channels and contacts in KidGram

Open the **ELARI SafeFamily** app on the parent's smartphone

Go to **KidGram** tab

Click on the switch next to **Search contacts and content of KidGram/Telegram**

Search allowed: Your child can search for new groups, channels and contacts but your permission is required to view them and chat

The child cannot search for groups, channels and contacts in KidGram

Preview chats, channels and groups in Telegram

If you see the **Telegram** button on the chat, group or channel plate, then you can view the chat in the Telegram app. To do this, click on the **Telegram** button on the chat plate, then you will be transferred to Telegram app or to the app store

If the Telegram button is missing, then it's impossible to view a chat, group or channel due to the settings of these chats or user accounts

Allow or deny chats

Launch the **ELARI SafeFamily** app on the parent's smartphone

Go to **KidGram** tab

Select the **Requests** subtab on the KidGram page

You will see a list of chats, groups and channels that the child wants to join and chat with or to which he was invited

Allow or **Deny** a chat/channel/group. While chats, channels or groups are in Request status, they are completely inaccessible to the child

Subsequently, you will be able to deny or allow the chat in the Allowed/Blocked subtabs

Click on this and the chat/group/channel will be approved for reading and chatting

Click on this and the chat/group/channel will be blocked and disappear from the child's chat list in the KidGram app

Viewing your child's chat statistics

Launch the **ELARI SafeFamily** app on the parent's smartphone

Go to **KidGram** tab

Select the **Chats** subtab on the KidGram page

Click **Statistics** on the chat plate: you will see chat statistics for 10 days by default

Click on the **filter button** indicating the number of days and select the timespan of the chat statistics to be revealed

Access to the child's chat history

Access to the child's chat history is provided free of charge as a part of BETA testing. Subsequently, you will need to acquire the Premium subscription to access the chat history

Launch the **ELARI SafeFamily** app on the parent's smartphone

Go to **KidGram** tab

Select the **Chats** subtab on the KidGram page

Click **Chat history** on the chat plate to view all messages in this chat, including deleted messages by the child or his correspondent

Chat history is available only for the chats, groups and channels that were previously allowed by you
